

## SQL Server Quick Scan Report

The SQL Server Quick Scan report is one of the many reports in Database Health Monitor. The SQL Server quick Scan report reports on all of the databases on your SQL Server instance to find possible issues.

If you need assistance with your database administration you can contact [Steve Stedman](#) at [Stedman Solutions, LLC](#). <http://StedmanSolutions.com>

You can copy the output from the Quick Scan Report and send it to Steve for evaluation or as part of the [Free 30 Minute Consult](#).

### SQL Server Quick Scan Report

The Quick Scan Report checks your SQL Server instance and reports on some common problems or issues.

The screenshot shows the 'Quick Scan Report for belize\sql2014' window. The left pane displays a tree view of 'Server Health' with categories like 'CorruptionChallenge1' through 'CorruptionChallenge8', 'cte\_demo', 'DBH\_Test', 'Historic', 'Technical Debt', and 'Real Time'. The right pane shows a table of results with columns 'Row', 'Type', and 'Warning'.
