

Quick Scan Report – Percent Growth

Percent growth enabled on files, this applies to either data files or log files.

Percent Autogrowth is not recommended.

📑 Change Autogrowth	n for PrimeNum 💌
✓ Enable Autogrowth	
File Growth	
In <u>P</u> ercent	20 🚔
◯ In <u>M</u> egabytes	10 💂
Maximum File Size	100 🚖
	100 🔻
● <u>U</u> nlimited	
	OK Cancel

If you have autogrowth set to a percentage number then as your database grows, the amount of growth will go up, and the time it takes to grow will also go up, and continue to get worse. It is recommended to have autogrowth on, and to have it set to a fixed size in order to accommodate unexpected growth.

🗄 Change Autogrowth for PrimeNum 💌		
 Enable Autogrowth File Growth 		
O In Percent	20 🌲	
In Megabytes	1000 🌲	
Maximum File Size Limited to (MB) Unlimited	100 🜩	
OK	Cancel	

The best option is to set the database size to be large enough that you don't need to be regularly growing.
