

Table Size Advisor

The Table Size Advisor estimates the amount of disk space being used by each column.

The screenshot shows a window titled "Table Size Advisor" with a table of data. The table has four columns: Ordinal, Column, Type, and Est. Size. The data is as follows:

Ordinal	Column	Type	Est. Size
1	BusinessEntityID	int	117kb
2	Person Type	nchar	117kb
3	NameStyle	bit	58.5kb
4	Title	nvarchar	8.1kb
5	FirstName	nvarchar	270kb
6	MiddleName	nvarchar	46.3kb
7	LastName	nvarchar	259kb
8	Suffix	nvarchar	220b
9	EmailPromotion	int	117kb
10	AdditionalContactInfo	xml	38.7kb
11	Demographics	xml	23.5MB
12	rowguid	uniqueidentifier	351kb

Below the table, there is a link for more information: <http://databasehealth.stevedman.com/Table-Size-Advisor>. At the bottom right, there are "OK" and "Cancel" buttons.

You can use this to determine which columns are responsible for the table size.
