

## Dangerous Versions of SQL Server

There are a few versions of SQL Server 2012 and SQL Server 2014 that are known to cause corruptions in certain situations.

These versions are

2012 versions between 11.0.2100 and 11.0.3436

2012 versions between 11.0.5058 and 11.0.5521

2014 versions between 12.0.2000 and 12.0.2369

The recommendation if you are running one of these versions that you check the release notes and update as soon as possible.

You can run the following query to check your product version:

```
select SERVERPROPERTY('ProductVersion');
```
