My plan…

Over the next 1 to 2 years I plan to add to the Database Health Reports, update the Database Health Reports, and grow the Database Health Reports, until it becomes the industry standard tool for DBA's to use to help get their job done every day.

For the next 3 to 6 months I will be releasing a new Beta release of the project about every 45 to 60 days depending on bug fixing and new features that I add into the project. Each of these [Beta downloads](#) will be free.
